PROFESSIONAL EXPERIENCE

Telecomunications and networking solutions deployment engineer at Teleinformatica D.O.O., Sarajevo

February 2011 — November 2011

As an engineer for implementing telecommunication and network solutions, my duties were to implement generic and non-generic solutions in small and medium enterprises, which are based on Linux Asterisk PBX platform in terms of VoIP and IPTV systems. Processes and skills which I have encountered during my work are:

- Implementing and maintaining Linux-server-client IPTV and VOD systems
- Implementing and maintaining PBX Asterisk server-client systems
- Creating technical documentation and user guides
- Participating in public tenders

Regional Sales Manager at EMC D.O.O,, Sarajevo

March 2012 — October 2012

During my professional engagement for the EMC D.O.O company, my business challenges were based on consulting jobs in areas of Computer Networking, security of Information Systems and creating business informatic architecture and environments for small, medium and large companies. Skills and experiences I have acquired during working there are:

- Creating ideal solutions based on requirements of clients in areas of Network and System Security based on world famous brands such as IronPort, FortiGate, McAfee and other
- Creating project solutions based on requirements of clients from network program HP Networking, based on server-client architecture
- Presenting generic solutions in areas of Computer Networking, Security of Computer Networking, managing and security of data
- Creating technical documentation and user guides
- Attending professional seminars and workshops in areas of Network Security and developing Information Systems
- Participating in public tenders
